

High Quality Video Promotes Teamwork and Collaboration

MXvideo™ Provides Fully Integrated Desktop Video Calling For a Rich Communications Experience

Zultys MXvideo™ provides affordable High-Definition desktop video calling that is fully integrated across a company's Zultys Unified Communications solution. With a single-click, Zultys MXIE™ users may seamlessly move from instant messaging to voice, and add video for a complete unified communications experience. MXvideo is an easy to use point-to-point video solution for an increasingly mobile and dynamic workforce that will increase productivity and teamwork through enhanced communication and collaboration.

MXvideo is a licensed software feature that requires no additional hardware to implement, and works across an MXnetwork™ to provide company-wide point-to-point video calling.

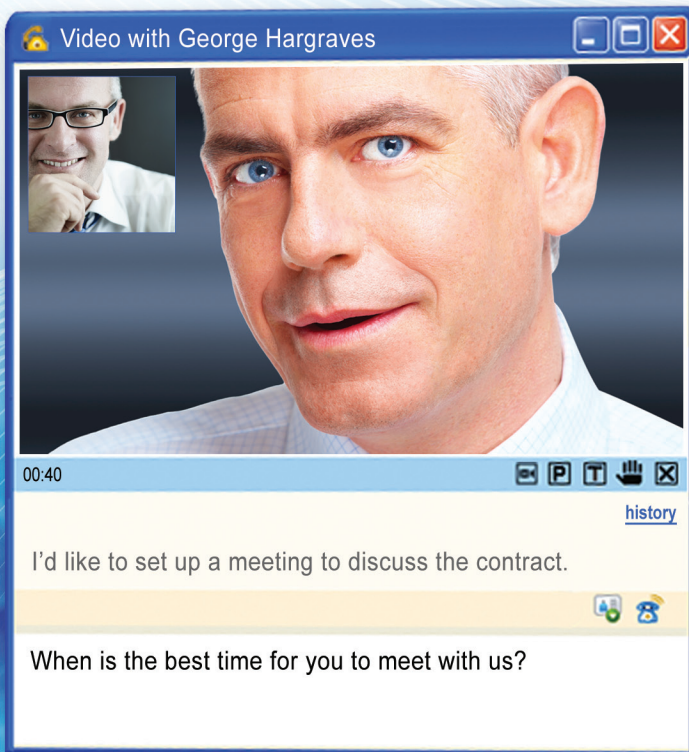

MXvideo is an ideal and affordable solution for organizations that want to add that personal "face time" touch to their inter-office and remote worker communications to promote teamwork and cut down on travel costs.

With a single-click, MXIE users may seamlessly move from instant messaging to voice, and add video for a complete Unified Communications experience
