

Cascade Telecommunications, Inc. to Distribute Essential Business Communications Disaster Recovery Tool

BEND, OR - December 22, 2009 – Cascade Telecommunications, Inc. is offering a failsafe disaster recovery system known as PBX Disaster Recovery. The dependable system will provide reliable backup for businesses across the nation.

“When a company’s phone system goes down business stops,” says Mr. Allan Clack, President. “With PBX Disaster Recovery, business owners can rest easy knowing that their system is protected.”

As a universally compatible solution, PBX Disaster Recovery acts as an automatic PBX failover. Should a PBX suddenly go RNA (Ring No Answer) or ATB (All Trunks Busy), a hosted virtual PBX from Cascade Telecommunications, Inc. will take over and route calls to preset emergency numbers. The backup system provides seamless integration so that if a PBX goes down, an organization’s customer will never know.

“Companies go to great lengths to back up data, co-locate servers, and otherwise protect the vital parts of doing business, but forget that their PBX is a large part of what

connects them with customers,” explains Clack. “PBX disaster recovery is one of the most overlooked aspects of business continuity planning – until it’s too late.”

As a cost effective solution, industry experts feel that the PBX Disaster Recovery product is an in-demand alternative to high-priced backup phone systems currently being offered.

“We feel it is our duty to offer this product to every business with a phone system,” says Clack. “Our goal is to make sure that each company has a contingency plan for their telecommunications in case of disaster, and we take pride in knowing that our solution can deliver that to them.”
